In addition to being a solicitor, Raymond is a chartered civil engineer, experienced mediator (ADR Group accredited), experienced Adjudicator (TeCSA accredited), fellow of the Institution of Civil Engineers and a member of the Legal Affairs Panel, and a Liveryman of the Worshipful Company of Engineers.

He is the author of the "Construction (Design and Management) Regulations 2015 Explained" published by Thomas Telford, having previously authored three previous editions of a book explaining the earlier Construction (Design and Management) Regulations. He is also the author of "A Commentary on Construction Contracts Part II of the Housing Grants, Construction and Regeneration Act 1996" also published by Thomas Telford and a contributing author to the ICE Manual of Construction Law.

Raymond is listed as a Recommended lawyer in the Legal 500 (2014 Edition) and is ranked in Chambers (2014 Edition) as a Leading Individual.

Legal Services

Dispute Resolution

Selected Cases

- Appointed as the adjudicator in various disputes up to a value of £22 million. The issues at stake in the adjudications have included entitlement to payment, valuations of variations and claims for time, loss and

expense, final certificates, interpretation of contract provisions and defective plant and materials.

- Appointed as the mediator in engineering and commercial disputes including professional fees, defective materials, machinery and workmanship and work undertaken by utilities or related supplies.
- Recovery of over £800,000 for the contractor in the adjudication of a solar panel contract by successfully arguing for loss of profit.
- Acted in shareholder dispute valued at £800,000 in a technology company and another valued at over £2 million in a manufacturing family business.
- Recovery of proceeds of fraud including the successful recovery of £1.6 million involving four employees in an engineering business.
